

APPROVED

LEVEL 3

Water Process Technician

Programme Overview

Welcome to the 48 month, Level 3 Water Process Technician programme.

Water Process Technicians perform reactive and routine maintenance on equipment to ensure safe and efficient operations, supporting other disciplines as necessary. The main roles within this occupation involve working on water supply and treatment; water networks and leakage, sewerage and wastewater.

Key Facts

 **Price**
£12,000

 **Apprenticeship Level**
Level 3

 **Duration**
Typically, 48 months.

 **Qualifications**
On completion of this standard apprentices are eligible for Engineering Technician (Eng. Tech) or equivalent professional registration.

Role Profile

Water Process Technicians are required to analyse and interpret faults on processing systems and use a variety of appropriate communication methods to interact with others to give and receive information accurately, in a timely and professional manner. They undertake testing on equipment and instruments whilst ensuring personal responsibility in complying with current and relevant industry standards and regulations. Water Process Technicians may also be required to complete reports and ensure that monitoring records are maintained for audit and or reporting purposes.

Core Knowledge

This standard delivers the following key knowledge areas:

- Water Industry Operations
- Industry Regulations
- Maintenance Practices and Processes
- Testing Procedures of Equipment
- Fault Finding Procedures
